SINGER®

Quantum Stylist™ 9960

Feature	Benefit
600 Built-In Stitches	Fulfill your creative dreams with a large selection of stitches including basic, decorative and stretch stitches for clothing construction, quilting, home décor and crafting.
13 Fully Automatic 1-Step Buttonholes	Buttonhole sewing is a simple 1-step process providing reliable results every time. The sides of the buttonholes are sewn in the same direction to prevent gaps in stitching or fabric distortion.
Exclusive Buttonhole Underplate	The buttonhole foot with underplate sandwiches fabric between a lower plate and the foot to ensure perfect buttonholes on multiple layers of fabric. Effectively, this is like a mini-embroidery hoop in which the machine feeds the attachment, rather than the fabric. It makes creating buttonholes possible in places that conventional buttonhole devices cannot easily reach.
Automatic Needle Threader	Sewing's biggest timesaver! This feature makes threading the eye of the needle quick and easy.
Automatic Stitch Length & Width	Optimal settings for stitch length and width are automatically set, but can be overridden for more personalized sewing.
Needle Up/Down Button	Pressing this button when the machine is stopped will change the needle position from down to up or from up to down.
Extension Table Included	The included optional extension table provides a larger working area, an essential for quilting or when working with a larger project.
Large Back-Lit LCD Screen with Brightness Control	Provides clear and easy viewing of stitch functions including stitch length, stitch width, tension settings, recommended presser foot, needle up/down position and more! Easily adjust the screen brightness.

Quantum Stylist™ 9960

Feature		Benefit
Top Drop-In Bobbin System		The bobbin loads from the top, so it is easy to insert the bobbin. The clear cover makes it easy to monitor the bobbin thread supply.
5 Built-In Alphabets		Personalize projects by adding a monogram, name or phrase with the built-in block or script style numbers and alphabets, both available in upper and lower case, stitched at 5mm stitch width.
Mirror Imaging and Elongation Functions		With just a touch of a button, selected stitches can be mirrored imaged, adding even more stitch variety. Press the Elongation button and selected stitches can be made up to 5 times longer
Electronic Auto Pilot		Unplug the foot control, press the Start button and the machine sews. You are still in complete control over the speed - just slide the Speed Lever to the desired speed.
7mm Stitch Width		Most stitches can be set for a maximum width of 7mm creating attractive satin and decorative stitches.
2 StayBright™ LED Lights		Two lamps illuminate the sewing surface for optimal viewing. The long-lasting bulbs (100,000 hours) are always cool to the touch.
Heavy Duty Metal Frame		The internal skeleton of the sewing machine is constructed of heavy duty metal. This rigid support holds all the mechanisms in perfect alignment for skip-free sewing and overall durability
25 Needle Positions		Needle position can be changed for individual projects like inserting zippers, cords and topstitching.
Electronic Twin Needle Settings		Stitches are automatically adjusted for twin needle sewing with just the touch of a button.
Drop Feed		A conveniently located lever lowers the feed dogs for free-motion embroidery, monograms and button sewing.

SINGER®

Quantum Stylist™ 9960

Feature		Benefit
7-Segment Feeding System		This is a specially designed feed system that ensures that the fabric is picked up and supported from the front of the presser foot to the rear. This provides for much more accurate feeding of the fabric.
Box Feed		This is a function that moves the feed dogs in a box motion, rather than the historic arc motion. Box motion assures perfect feeding throughout the entire feed process, as the feed dogs are always in perfect and equal contact with the fabric and presser foot.
Six Second Threading		Threading the machine is so easy that you can have the entire machine threaded, from the spool to the needle's eye, in just six seconds
Automatic Locking Stitch Function		Tie-off decorative and utility stitches with just a push of a button. This feature ensures quality stitching and prevents unraveling.
Automatic Reverse		Push the conveniently located Automatic Reverse Button to sew in reverse and reinforce the stitch.
Horizontal Threading		Allows for the thread to feed more evenly reducing poor stitch formation and thread breakage.
High Sewing Speed		With a maximum sewing speed of 850 stitches-per-minute, projects can be sewn quickly.
Automatic Bobbin Winding Clutch		Needle bar automatically disengages when winding the bobbin, making bobbin winding safer.
Direct Button Stitch Selection		Provides direct access to eight of the most popular stitches including straight, zigzag, blind hem and buttonhole.
Stitch Reference Chart		This chart, located on the upper lid of the machine, allows you to quickly choose the perfect stitch for your project – eliminating tedious screen searching.

SINGER®

Quantum Stylist™ 9960

Feature		Benefit
Automatic Tension		This system ensures stable stitch quality, regardless of fabric type. The tension can be adjusted using the tension adjustment buttons, if desired.
Extra-High Presser Foot Lifter		The Presser Foot Lifter has two heights. The second offers more clearance, which is needed when placing multiple layers of bulky fabric under the presser foot.
Free Arm		Provides easy access to cuffs, collars, pant hems and other difficult-to-reach areas.
Center Zigzag Taper		When tapering with the zigzag stitch, the stitch tapers to the center, not the left or right. This feature is especially valuable when appliquéing, because it provides a more attractive look when tapering into or out from a point.
Automatic Presser Foot Pressure Control		The amount of pressure exerted on the fabric by the presser foot against the feed dogs is adjusted automatically. Sew from the lightest weight tricots to the heaviest denim, without making adjustments.
Error Warning		An audible warning alerts the sewer if something is incorrect. The audible warning can be deactivated, if desired. A picture appears on the LCD screen illustrating the probable error.
On Board Storage		The accessories are conveniently stored in the removable sewing table, providing easy access to accessories.
Snap-On Presser Feet		Easily change snap-on presser feet without use of a screwdriver.
Optimum Power Control		A control system that senses when additional power is required to maintain speed through thick or changing fabric conditions. This feature is most useful when sewing through multiple (6-8) layers of fabric.
DC Motor		Provides instant start and stop with no coasting, for accurate and precise stitch placement.
